

## Instruction

You can find the necessary documents and database files to execute the program in test folder.

Use The SQL files given in the folder to restore the database under the name “scholarshipprograme”

Use “scholarshipprograme” for only Structure

Use “scholarshipprograme\_WithData” for structure with mock data

Place the folder named “test” in htdocs folder of xampp server

Then run the program by typing <http://localhost/test/index.php> in the address bar of your browser, the website is developed to run in google chrome.

If you have use the “scholarshipprograme\_WithData” for your database the use the fallowing credentials (Username, Password) to log in as the fallowing actors.

### Student

Asanka	123
Chirath	123
Yuvn	123

### Donor

Ijaz	6850
------	------

### Moderator

Ifham	123
-------	-----

You also can create your own actors of your choice and use the system.

Note: - If you are creating “Moderator” account then you have to active him manually by changing the field “Status” in login from “0” to “1”.
